

## THE ECONOMICS OF NATURAL GAS

15th April 2019 | 9.00 – 10.30 am  
Prokopova 100/16 Prague 3, room 201

The lecture will provide the whole picture of natural gas market in terms of demand, supply and interconnections among different important markets around the world. It will emphasize on key developments in global gas in recent decade including the role of the Liquefied Natural Gas (LNG) and dress some challenges of this growing sector. Also, the lecture will present elasticity of demographic and social determinants on natural gas demand in the OECD countries.

## ENERGY AND DEVELOPMENT: THE CASE OF MOROCCO

17th April 2019 | 12.15 – 13.45  
Prokopova 100/16, Prague 3, room 201

The lecture will first give some key insights about the Moroccan energy sector and then raise the question of energy dependence and the security of supply as the main energy challenges facing the country. The lecture will also highlight the efforts made by Moroccan government to solve the question of energy security and dependence through the renewable energy strategy, and explore the country's potential in terms of solar, wind and hydropower. At the end, some political, economic and technical obstacles to the Moroccan energy strategy will briefly be discussed.

## ECONOMIC & SOCIAL DEVELOPMENT: THE CASE OF MOROCCO

15th April 2019 | 14.00 – 15.30  
Prokopova 100/16, Prague 3, room 202

The lecture will be an opportunity to discuss the Moroccan social and economic development process. The focus in this lecture will be on two crucial points: i) the start of economic and social convergence, including achievements of Morocco in terms of economic and social progress over the past decades, ii) the slow and incomplete convergence process in terms economic and social development.
